PROFESSIONAL SUMMARY

Results-driven Data Analyst and Statistician with a BS in Statistics from Kohat University of Science and Technology. Proficient across the full data analytics and business intelligence lifecycle — ETL pipeline development, statistical modeling, machine learning, Power BI dashboard design, and executive reporting. Skilled in Python, SQL, Advanced Excel, Power BI, and DAX. Published author of peer-reviewed ML research achieving 97% model accuracy on an 85,000-patient healthcare dataset. Completed 7+ analytics projects spanning retail business intelligence, healthcare predictive modeling, and consumer behavior analysis — independently managing requirements, data pipelines, modeling, visualization, and stakeholder reporting from end to end. Highly persistent, self-directed, and genuinely passionate about data-driven problem solving. Available for on-site positions across GCC countries (Saudi Arabia, UAE, Qatar) and open to remote opportunities worldwide.

TECHNICAL SKILLS

Programming	Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), R, SQL (MySQL)
BI & Visualization	Power BI, DAX, Power Pivot, Excel Dashboards, Matplotlib, Seaborn
Data Analytics	Data Cleaning, ETL Pipelines, Power Query, EDA, Data Modeling, Reporting
Statistics & ML	Hypothesis Testing, Regression Analysis, Time Series, Forecasting, Random Forest, SVM, Logistic Regression, Decision Tree, KNN, Gradient Boosting, Naive Bayes, PCA
Spreadsheets	Microsoft Excel (Advanced) — Pivot Tables, Power Query, Dashboard Design, Power Pivot
Database	MySQL — Queries, Joins, Aggregations, Data Extraction
Other Tools	SPSS, MS Office Suite, AI-Assisted Analysis, Typing: 50+ WPM / 95%+ Accuracy

PROFESSIONAL EXPERIENCE

Freelance Data Analyst | Independent Clients (Remote) 2023 – Present

Client Types: Local retail businesses, academic researchers, individual business owners

- Delivered 7+ end-to-end analytics projects for independent clients in retail and healthcare sectors; managed full lifecycle including requirements gathering, ETL pipeline design, statistical modeling, and stakeholder reporting — with 100% on-time project delivery across an average turnaround of 6–8 weeks per engagement.
- Managed 5+ concurrent client relationships; translated business requirements into structured analytical frameworks and delivered data-driven recommendations informing pricing strategy, inventory decisions, and marketing spend allocation.
- Completed Fish Market Consumer Behavior Analysis for a client; applied ANOVA and Chi-Square hypothesis testing on a 200-record dataset to identify 3 statistically significant behavioral drivers (education level, household type, socioeconomic status) — enabling targeted marketing strategy recommendations.

References available upon request

- Conducted 3+ additional retail and research data analysis engagements; delivered structured insight reports, dashboard summaries, and actionable findings tailored to each client's business context.

PROJECTS & PORTFOLIO

Saudi Retail Analytics & Business Intelligence Solution | Self-Initiated | Excel | Power Query | DAX 2025 – 2026

GitHub: github.com/Junaid-Khan199/saudi-retail-analytics-Project

- Designed and built a complete retail business intelligence solution on a self-created, intentionally complex dataset (106,000+ transactions, 5 months, 20 stores, 11,300+ customers, 300+ products).
- Engineered a fully automated ETL pipeline in Power Query using Folder Connection; new monthly files auto-process on refresh — zero manual intervention required, simulating a real-world production data pipeline.
- Built a relational data model in Power Pivot connecting Transactions, Customers, Products, Stores, and Returns; enabled dynamic cross-table KPI calculations using DAX.
- Delivered two interactive executive dashboards tracking: Gross Sales 149.52M SAR, Net Revenue 127.02M SAR, Profit Margin 4.86%, AOV 1,249 SAR, Return Rate 4.41%, and Discount Rate 12.52%.
- Identified cost-to-revenue ratio of ~95% as a critical margin risk; flagged Electronics as top revenue driver and December 2025 as peak sales period — findings structured as executive-ready business recommendations.

Oral Cancer Early Detection — Peer-Reviewed ML Research | Academic | Python | Scikit-learn | Pandas 2024 – 2025

Published: Journal of Multidisciplinary Applications in Statistical Science, Vol. 1 No. 1 (2025) | DOI: 10.5281/zenodo.17674785

- Led full machine learning pipeline on 84,922 patient records with 25+ demographic, lifestyle, and clinical attributes to build a clinical decision-support system for early oral cancer detection.
- Comparatively evaluated 7 ML algorithms (Logistic Regression, Decision Tree, Random Forest, Gradient Boosting, SVM, KNN, Naive Bayes); best result: Random Forest at 97% accuracy and ROC-AUC 0.98, SVM at 97% accuracy with Recall 0.98.
- Identified tumor stage, tumor size, lifestyle factors (tobacco, alcohol, betel quid), and socioeconomic variables as top predictors; findings published open-access in a peer-reviewed indexed journal.

Superstore Sales, Returns & Profit Analysis Dashboard | Self-Initiated | Excel | Pivot Tables | Power Query 2024

GitHub: github.com/Junaid-Khan199/SUPERSTORE-SALES-RETURNS-PROFIT-ANALYSIS-DASHBOARD-EXCEL-

- Analyzed a Kaggle retail dataset (Total Sales: \$2.29M, Profit: \$285K, Average Margin: 12%) using advanced Excel pivot analysis and interactive dashboard design.
- Identified Tables sub-category operating at -\$17.7K net loss and recommended a 15% price review; Technology category analysis revealed an 18% margin opportunity — findings structured as a category-level profit optimization strategy.
- Regional analysis revealed West as strongest performer; Central region lagged with a measurable gap. Quantified returns at 8% of total orders as a direct profitability drag requiring sourcing and QA review.

Python Regression Analysis — IMDb Movie Dataset | Academic | Python | Scikit-learn | Seaborn 2023 – 2024

- Applied Simple Linear, Multiple, Logistic Regression, and PCA on the Kaggle IMDb dataset to model movie revenue predictors and demonstrate end-to-end regression workflow.
- Full pipeline: data cleaning (missing value handling) → EDA → model training → MSE/R² evaluation → visualization with regression lines, residual histograms, and styled console outputs via Rich and Colorama.

Fish Market Consumer Behavior Analysis | Client Project | Python | Pandas | SciPy | Seaborn2023

GitHub: github.com/Junaid-Khan199/-Fish-Market-Consumer-Behavior-Analysis

- Delivered as a paid client project; independently framed research questions on a 200-record dataset with no guided instructions — demonstrating self-directed problem scoping.
- Applied ANOVA and Chi-Square hypothesis testing to identify 3 statistically significant behavioral drivers: education level influences purchase motivation; household type affects fish size preference; socioeconomic status correlates with purchase frequency.

EDUCATION

BS — Bachelor of Science in Statistics | Kohat University of Science & Technology (KUST)2021 – 2025

CGPA: 3.02 | Kohat, KPK, Pakistan

- Relevant Coursework: Statistical Inference, Probability Theory, Regression Analysis, Python Programming, R, Research Methodology, Time Series Analysis, Multivariate Analysis, Hypothesis Testing
- Final Year Project: Conducted graduate-level original research on machine learning for healthcare; peer-reviewed and published in an indexed academic journal (see Publications).

FSc — Computer Science (Pre-Engineering) | Government Degree College Gumbat, Kohat2018 – 2020

Total Marks: 768 | Kohat, KPK, Pakistan

CERTIFICATIONS

Certificate	Issuing Organization	Completed
Diploma in Information Technology (DIT)	Institute of Computer Expert (ICT)	2024
Data Analytics & Business Intelligence	DigiSkills Pakistan/ VU	Dec 2025 – Mar 2026
Basic Python Programming	Kaggle	Dec 2025
Freelancing	DigiSkills Pakistan/ VU	Dec 2025 – Mar 2026
Intro to Programming	Kaggle	Dec 2025

LANGUAGES & SOFT SKILLS

Languages

English: Professional Working Proficiency

Urdu: Native

Pashto: Conversational

Soft Skills

- Problem Solving — independently debugged complex multi-source ETL failures
- Analytical Thinking — applied 7 ML algorithms comparatively on 85K+ records
- Attention to Detail — zero errors across 106,000+ transaction records cleaned
- Client Communication — managed 5+ client projects with 100% on-time delivery
- Self-Discipline — completed peer-reviewed research as a sole author under university deadlines
